PROJECTS

PawMeets: <u>LINK</u> | <u>GITHUB</u>
- A dog dating app that allows users to create dog profiles and swipe through eligible prospects. PawMeets is a MERN stack application built with React and MongoDB/Express. It has authentication, validation, error handling, and other functionalities, all paired with a playful, engaging UI.

Web Portfolio: <u>LINK</u> | <u>GITHUB</u>
- My website presents a distinctive and eye-catching design, built with user interactive 3D elements. It's built with React, Next.js, React-three-fiber, React-three/drei, Framer Motion, and Chakra-UI.

Adventure Game: <u>LINK</u> | <u>GITHUB</u>
- Embark on a journey through worldly adventures while you attain the lowest score possible. This text-based game is developed using JavaScript, HTML, and CSS, utilizing a binary tree data structure.

PROFESSIONAL EXPERIENCE

Kalyani: New York, NY, *Software Developer Intern* | Sept 2022 - Feb 2023
- Provided substantial contributions to Kalyani, a health-focused start-up, by engaging in both business and app development. I played a key role in generating ideas through creative brainstorming sessions.
- Designed and integrated custom Flutter widgets seamlessly into our mobile apps, ensuring consistent and engaging user experience across both iOS and Android platforms.
- Engineered an intuitive expense tracker in C++, delivering cost savings and enhancing financial management.

ClubFeast: New York, NY, *Business Development Manager* | Sept 2021 - Apr 2022
- Effectively pitched to major restaurant groups, resulting in valuable partnerships that significantly increased food orders through the app, contributing to an 18% growth in sales.
- Collaborated with engineering and resolved app issues, identified bugs, and provided valuable UX insights.

Hyundai Genesis: New York, NY, *Event Coordinator* | Mar 2020 - Sept 2021
- Delivered a series of compelling speeches to executives, including the Global COO of Hyundai Motor Group and the CEO of Genesis North America, outlining the future vision for Genesis' new event spaces in New York City.

ViacomCBS: New York, NY, *Event Coordinator* | Apr 2019 - Mar 2020
- Dynamically worked with project managers, clients, venues, stakeholders, and vendors, while proactively managing deliverables across dozens of events simultaneously utilizing JIRA software.
- Created the 2019 activation for South Park at Comic-Con, resulting in a +224% increase in social media mentions.

WeWork: New York, NY, *Event Lead* | Apr 2018 - Mar 2019
- Spearheaded initiatives for WeWork start-ups to enhance connections and networking within the community. I successfully organized and executed 100+ events, several drawing over 200 persons in attendance.

EDUCATION

General Assembly Bootcamp: Software Engineering Immersive Certificate, May 2023

Udacity: Introduction to Programming Certificate, April 2022

QuantNet C++ Certification: In progress, Jan 2024

New York University: Bachelors in *Hotel and Tourism,* concentration in *Event Management*
